Major Subdivision Application Page 6 of 12 July 2024

Barco Reserve Conservation Subdivision Attachment to Use Permit Application

Purpose:

The Barco Reserve subdivision proposes the division of approximately 94.84 acres into a conservation subdivision of 45 lots. The property is split-zonind, with approximately 17.46 acres along US 158 (Shortcut Road) zoned MXR, and the remaining 77.38 acres zoned AG. Fifteen 15,000 square foot single-family lots are proposed in the MXR zoning district, and thirty 30,000 square foot single-family lots are proposed in the AG zoning district. 61.36 acres (almost 65%) open space is being provided. Roadway and drainage improvements are proposed, along with waterlines and other public utilities.

Suggested Findings:

- A. The use will not endanger the public health or safety due to the following:
 - Stormwater management will be provided in excess of the requirements of the current Currituck County stormwater manual and the UDO and in accordance with NCDEQ regulations. The 100-year storm event will be modeled and stormwater management facilities will be provided in accordance with the model results.
 - 2. Albemarle Regional Health Services has evaluated each of the 45 new lots for suitability for wastewater disposal and has provisionally approved each lot as being capable of properly treating domestic wastewater with properly filled and drained lots.
 - 3. The project is being designed in accordance with the NC Department of Energy, Mineral and Land Resources sedimentation & erosion control standards, and will therefore minimize erosion and will contain siltation on site.
 - 4. Potable water supply is being provided in accordance with NC Public Water Supply rules and will be modeled to demonstrate that fire flow and pressure is available to meet the fire code requirements for fire protection, while meeting maximum day domestic demand.
- B. Land to the north and south is developed as residential. Land to the east and west along the highway has also been developed as residential; land to the east and west of the main part of the tract is currently being farmed. 50' farm buffers are being provided to the proosed development. Values will be similar to those in nearby subdivisions. The use will not injure the value of adjoining or abutting lands, and will be in harmony with the surrounding area.
- C. The 2020 Land Use Plan (Imagine Currituck) classifies this area as a G-1 Low Density Growth area, suitable for residential subdivisions with a suggested density of up to 1 dwelling unit per acre. The proposed density is 0.47 unit per acre, less than half of the allowed density in G-1.

The following policies of Imagine Currituck appear to support the proposed request:

Conservation subdivisions are valued over other less-compatible development types.

- Encourage development to occur at densities appropriate for their location and consider factors, including but not limited to: environmentally suitable areas; suitable soils, adequate infrastructure; the type and capacity of sewage treatment available to the site; the adequacy of transportation facilities providing access to the site; and compatibility and proximity of the site to existing and planned County services. Land Use Policy 1.3: Consider community character and established visions for the community.
 - Continue to protect water quality through stormwater management practices, preservation of riparian buffers, water quality and quantity standards to protect groundwater and prevent pollution, saltwater intrusion and draw-downs

Locate residential development close to schools and recreation areas with ease of access to Caratoke Highway.

D. Currituck County appears to have adequate public school facilities to serve the proposed subdivision.
